

Rescuing Biodiversity

About the Book

Restoration ecology is a vital tool to mitigate the crisis caused by the global destruction of biodiversity, one of the most powerful existential threats to future generations. Johnny Armstrong's *Rescuing Biodiversity* tells the story of one man's attempts to preserve a vanishing Louisiana ecosystem and restore the animal and plant species that once lived there.

About the Author

Author, conservationist, and retired medical doctor Johnny Armstrong lives with his wife, Karen, in an old-growth forest and woodland protected by the Nature Conservancy outside of Ruston, Louisiana.

Sunday, August 13th ~ 2:00

Union Parish Library ~ Farmerville

Meet author and conservationist, Johnny Armstrong as he shares his story of the protection and restoration of a North Louisiana ecosystem. His work with the Nature Conservancy and more importantly his passion for restoration ecology serves as a model for how one man can make a difference!
